SECURITY DECODED

**Framing the Problem**

**Questions for Panel**

**Open Discussion**

- Develop an Information Security Risk Management model that fits your organization
- Evaluate information security risks consistently with actionable results
- Distinguish between common risk terminology and devise your own vocabulary for risk
- Evaluate your own program against the prerequisite steps for building a risk-based program
- Understand the benefits and constraints of common risk frameworks

# Do we have enough historical data now for a quantitative approach to infosec risk mgmt (like an actuarial)?
